

Step Up In Travel Industry With Smart Car API

Being a leading travel technology company, we specialize in developing car booking engines and API integration. Our aim is to provide a new dimension of service concept in the travel industry and always strive to stay at the technological forefront by offering the best solutions.

Over the years, Trawex has acquired tremendous experience in offering world class Travel APIs by connecting more than 150 travel suppliers and third-party services all over the world. Trawex APIs connect customers directly to their car rental booking software so that OTAs, tour operators or travel management companies can deliver car deals to their customers from more than 70 countries.

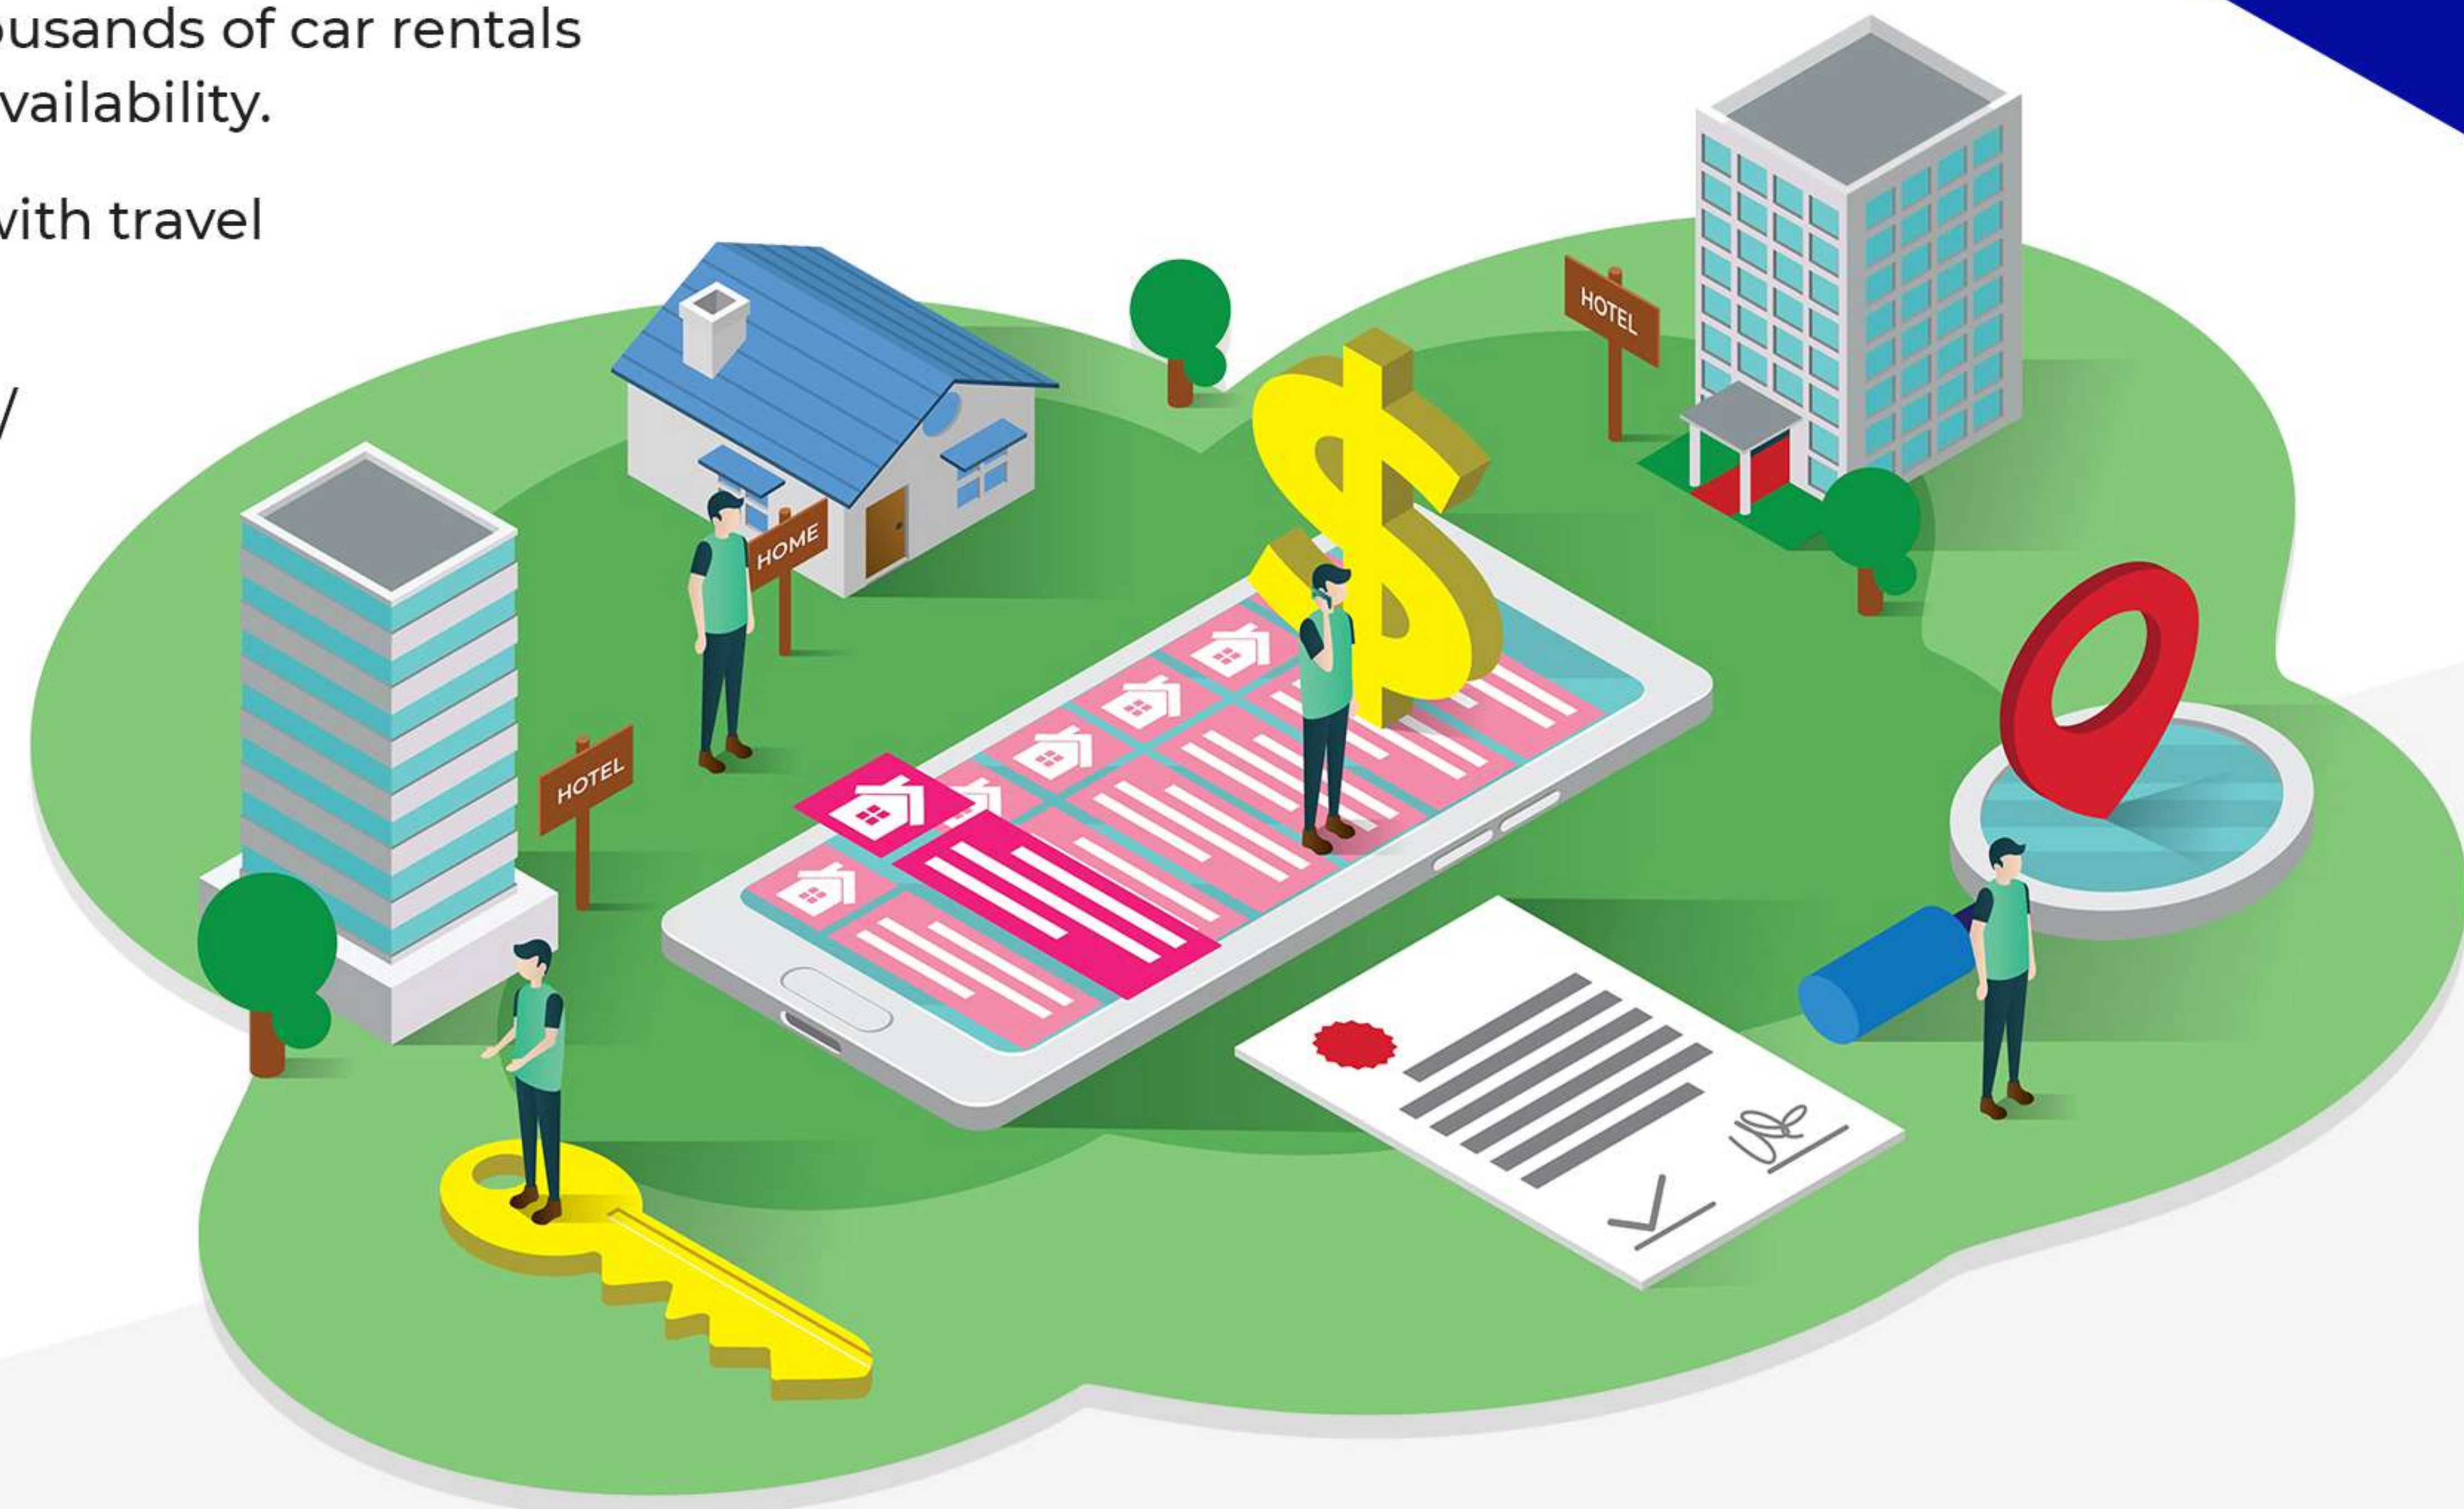

Build A Strong Customer Base

2,500 locations in over 100 countries around the globe allow you to enjoy all the benefits of renting the cars no matter where you are located.

- It enables travelers to book for rental cars and to complete Online Car Rental Reservations from anywhere.
- Travelers, with a single search, they can view thousands of car rentals from across the world with real-time rates and availability.
- Travelers also save time by connecting directly with travel agencies for any support.
- Travelers choose the car pickup and return date/ location, calculate the length of the rent, and choose a vehicle according to their interest.
- Travelers will be able to take benefits of the best fares on cars from global suppliers.

Smart Features:

- Transparent and easy booking process
- Easy setup and flexible integration
- Provide Better Customer service
- Advanced search options available
- Simplicity in the XML web services
